

Case Study

Aligning Security Solutions and Business Objectives

Enterprise-wide digital defenses

From a growing number of data breaches to expanding compliance requirements, the security landscape is evolving rapidly. Cloud + Data Center Transformation (CDCT) Security Services help you operationalize security so that you can keep abreast of the changing threatscape, mitigate risk, and protect your valuable assets on all on-premise and public cloud platforms.

Empowering your proactive security stance

The most cost-effective way to handle cyberattacks is not to respond to them but to anticipate them and take proactive steps to mitigate risk. That's why we make security a top priority in everything we do — from architecture and deployment to cloud services and data center transformation.

CDCT Security Services include:

-  Security strategy workshops
-  Security roadmaps
-  Solution design and technology selection
-  Security tool rationalization
-  Monitored and managed security
-  Managed security operations center (SOC)

Benefits of Security Services

By capitalizing on our skills, experience, and strong relationships with industry-leading technology providers, your organization is able to:

Mitigate risk

- Quickly identify and resolve vulnerabilities
- Implement enterprise-wide protection

Operate more efficiently

- Prove compliance efficiently
- Improve technology flexibility
- Accelerate time-to-value for investment

Improve the client experience

- Enhance privacy
- Improve access

Operate more cost effectively

- Move from CapEx to OpEx
- Rationalize security toolsets by reducing license and maintenance costs

Advancing security initiatives through effective engagements

Leading distributor of vehicle components seeks guidance after the departure of its CISO

- Provided temporary CISO
- Developed project plans for addressing areas of concern
- Addressed key issues including DNS, Active Directory, PKI infrastructure, password remediation and vaulting, encryption, file sharing, and data loss prevention

Addiction treatment and advocacy organization implements new security initiative following a security breach

- Identified and prioritized nine security initiatives aligned with business outcomes
- Defined governance framework around ISO 27002
- Developed 18-month roadmap with key milestones

Large not-for-profit healthcare organization initiates a three-year security assessment program following acquisition

- Performed external and internal vulnerability and penetration testing
- Conducted compliance audit
- Performed HIPAA and PCI Strategic Security Assessment

National litigation law firm with three U.S. offices enhances security after breach

- Performed on-site and remote vulnerability scanning and implementation of a NextGen Firewall to assess ingress/ egress traffic
- Identified 10 high and 3 critical vulnerabilities, and 1,400 login attempts in a Brute Force Attack targeting a terminal server
- Reviewed network diagram and proposed future state complete with new firewall, wireless and network hardware, installation and integration, and managed services

Meaningful solutions driving business outcomes

We help our clients modernize and secure critical platforms to transform IT. We believe data is a key driver, hybrid models are accelerators, and secure networks are well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.
