

Cloud + Data Center Transformation

Modernize with confidence

There are many forces at play today. Critical infrastructure is aging and underperforming. Cloud presents compelling opportunities to secure business results and support innovation. Data is your most valuable asset, providing opportunities to gain competitive advantage and increase market share. Optimizing data security, storage, utilization, and computational power are top of mind.

Insight Cloud + Data Center Transformation (CDCT) helps clients modernize and secure critical platforms and transform IT.

The long-game is digital transformation — differentiation, new delivery models, redefining client experience, and perhaps, our very world. But, first things first. IT transformation sets the stage for digital transformation, enabling a faster and more sustainable evolution.

What does IT transformation mean?

Flexible, high-performance platforms

Heavily automated and orchestrated

Purposeful cloud platforms strategy

We believe that:

- + IT transformation is required to enable digital transformation.
- + People, processes, and infrastructure modernization all play a part in driving transformation.
- + The modern data center is cloud. Hybrid is the optimal operating model and data is the key consideration.

A holistic approach

The more we know about your business, the better equipped we are to deliver for you. What are your organizational needs and challenges? What outcomes are you hoping to achieve? Transformation is not a plug-and-play exercise, but rather a systematic evolution that involves people, processes, and technology. Thus, our approach is holistic. We are a client-focused integrator, free to recommend optimal solutions regardless of vendor, platform, or technology. Our IT experts double as business consultants who deliver solution designs that champion what is best suited to your workload and business requirements.

Why CDCT services

30+ years of data center experience 

~35,000 critical enterprise infrastructure components monitored 

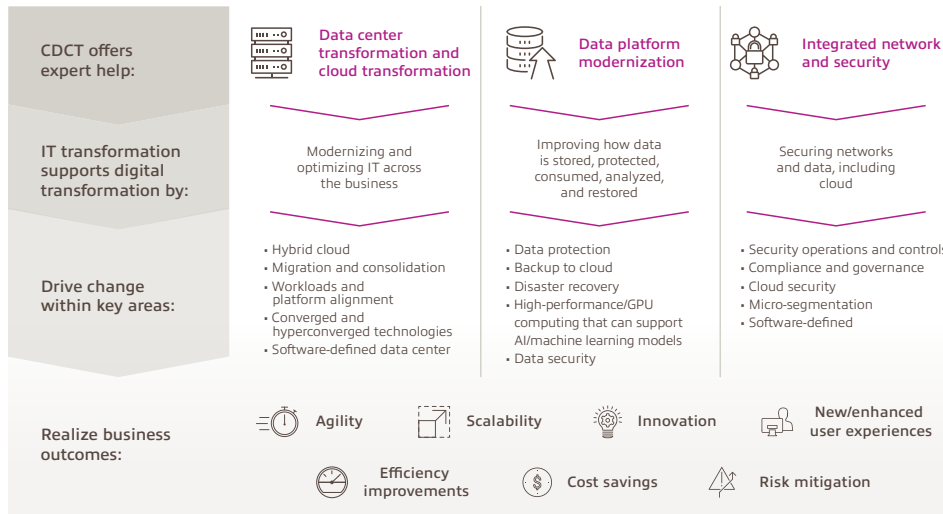

Monitoring data center assets on **6 continents**

>40 PB of data and **>350,000** workloads migrated since 2015

~1B cost savings identified for customers 

~1M devices discovered, analyzed, and remediated for cloud readiness

We work in three key areas

We are part of Insight

CDCT is one of four solution areas at Insight, alongside Supply Chain Optimization, Connected Workforce, and Digital Innovation. Through our deep partner relationships and creative mindset, we provide meaningful outcomes to complex business challenges. Collectively, we help clients manage today and transform for tomorrow.

Supply Chain Optimization

Optimize investments and perform better.

- E-procurement
- Global supply chain
- Lifecycle services
- Integrations

Connected Workforce

Engage with customers and workforce differently.

- Digital workplace
- Content and collaboration
- Enterprise mobility
- Managed workplace services

Cloud + Data Center Transformation

Efficiently deploy, manage, and secure.

- Modern data centers
- Cloud/hybrid cloud transformation
- Storage and data protection
- Secure networks and IT security

Digital Innovation

Turn ideas into value.

- App modernization
- Data, analytics, and business intelligence
- AI, ML, IoT, mixed and augmented reality solutions

Start the conversation

Position your organization to excel. **Start with a quick consultation** to discuss your business needs and goals — and how we can support you.

Meaningful solutions driving business outcomes

We help our clients modernize and secure critical platforms to transform IT. We believe data is a key driver, hybrid models are accelerators, and secure networks are well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.
