Is Your Organization Considering Microsoft Power BI?

Insight®

Accelerate business intelligence with a Power BI Workshop.

Begin harnessing the power of your data.

Businesses today run on intelligence. The ability to discover, share and integrate data intelligence determines which companies thrive — and which will be left behind. A key part of being successful is having competence with advanced tool sets such as Microsoft® Power BI®.

What is a Power BI Workshop?

Insight can help you unlock the value of your data using the robust capabilities of Power BI. In a Power BI Workshop, we'll develop compelling visualizations and intelligence implementations that integrate with your current data estate.

You'll learn how to use Power BI to:

- Extract and model data.
- Develop powerful and interactive visualizations.
- Share reports and dashboards with authorized users.
- Access reports and dashboards from browsers and mobile applications.

Our approach

Exploration (Day 1)	Rapid Proof of Concept (PoC) (Day 2)	Deployment (Day 3)
Through discussion and hands-on exercises, we review the capabilities of Power BI, including connecting to data sources, modeling data, visualizing data and sharing throughout the organization.	We roll up our sleeves to iteratively develop one or more sets of reports and dashboards, based on the cases discussed on the first day of the workshop, to give you one or more demo-ready Power BI solutions.	We deploy the PoC and make it available to your business users. You'll be equipped to demonstrate value to your business and identify next steps for your Power BI journey.

Workshop details

Duration:
2.5 days

Location:
On-site or at an Insight office

Benefits:
- Develop knowledge of Power BI capabilities and best practices.
- Demonstrate rapid prototyping using your data.
- Deploy one or more Power BI demos.

How to prepare:
The workshop will deliver the most value for your organization if you invite key business and technical stakeholders and come prepared with possible scenarios to explore with Power BI.
